

FourStar™ Vendor Presentation

35th Annual Conference of the Mid-Atlantic Mosquito Control Association

Bill Mintz, Sales Manager

David Sjogren, Business Manager

Bob Sjogren, Technical Manager

FourStar Microbial Products LLC

- Develop long lasting formulations for catch basins and other urban larval habitats
- Minimize labor requirements by reduced treatment frequency
- Offer a variety of control durations to fit the needs of each program
- Use active ingredients that are environmentally compatible
- Design formulation with resistance management in mind

Briquet Features

- 6% Bs/1% Bti ratio
- 3 sizes – 10, 15 & 30 gm
- Dual Action Release Technology
- Controls in the larval stage
- Larval mortality allows for field inspection
- Ideal rotational tool

- FourStar™ 30 gm Briquet averaged 99.5% control in simulated catch basins for >180 days
- FourStar 15 gm Briquet averaged 96.3% control in simulated catch basins for >90 days
- FourStar 10 gm Briquet averaged 98.4% control in simulated catch basins for >60 days
- FourStar Briquets effectively controlled *Cx. quinquefasciatus* and *Cx. stigmatosoma* in highly organic simulated catch basins

- FourStar™ 30 gm Briquet control averaged >98.9% mortality in abandoned swimming pool tests for up to 70 days (i.e. when pools were drained)
- FourStar 15 gm Briquet control averaged >97.8% mortality in abandoned swimming pool tests for up to 81 days (i.e. when pools were drained)
- FourStar Briquets effectively controlled *Cx. quinquefasciatus* in abandoned swimming pools

FourStar Microbial Briquets—the silver bullet you've been waiting for.

FOURSTAR BRIQUETS utilize the proven active ingredients *Bacillus sphaericus* (Bsph) and *Bacillus thuringiensis israelensis* (Bti), combined with patent pending sustained release technology. There are three briquet sizes available with control durations of 45, 90 and 180 days. They are powerful ammunition for those sites you'd like to treat and forget about like catch basins and swimming pools.

"SILVER BULLET" REFERS TO ANY STRAIGHTFORWARD SOLUTION PERCEIVED TO HAVE EXTREME EFFECTIVENESS. THE PHRASE TYPICALLY APPEARS WITH AN EXPECTATION THAT SOME NEW TECHNOLOGY OR PRACTICE WILL EASILY CURE A MAJOR PREVAILING PROBLEM.
—WIKIPEDIA

ADAPCO
GROUP OF COMPANIES

FOURSTAR™ 

- Proven microbial active ingredients Bs & Bti are environmentally compatible
- Briquets provide long term residual control of mosquito larvae
- Reduced treatment frequency saves on application labor cost.
- Three briquet sizes provide for up to 45, 90 & 180 days of control
- Combination of Bs and Bti is proven to prevent resistance
- FourStar Briquets are ideal for use in rotation with Altosid®

Distribution

- FourStar Briquets are now commercially available and are distributed by ADAPCO nationwide.
- Please contact your sales representative for more information.
